

DISTRIBUTION POLE INSPECTIONS

We have contracted Global Utility Services to test the condition of the distribution poles in our service territory.

They will begin working on Thursday, October 22 and continue until completed. They will be working in the rural areas of Butler County in the Franklin and Bone Creek Townships.(Purple highlighted area)

There will be no outages related to pole inspections.

Crews will dig around the base of the poles.

You may notice personnel with ATV's along our poles, as well as trucks and trailers. They may be parked along the roadway.

Thank you for your cooperation. This work supports our ongoing commitment to reliable electric service.
